

# Glenn Louedec

Fullstack Python Engineer

📍 Kawasaki, JP    ✉ g.louedec@live.fr    💻 glenn-louedec    🌐 Glhou

## Summary

Software engineer based in Tokyo with experience in Python/Flask/FastAPI backend development, API integrations, and production systems. Currently expanding expertise in DevOps, cloud infrastructure, automation, and scalable backend solutions. I like good and readable code and I am currently learning Golang. Holds a Master's in Engineering from Keio University and Centrale Marseille.

## Experience

### BHJ Soft Corporation, Fullstack Software Engineer

Ebina, JP

- Built a microservice to access multiple APIs (DHL, UPS, Japan Post, Fedex, Sagawa, Yamato) and get shipping fees under 10 seconds.
- Integrated and maintained external marketplaces (Shopify, eBay).
- Built Terraform IaC from scratch to deploy and manage microservice on EC2.
- Streamed data from database to database with a custom ETL pipelines to copy millions of rows and sync them.
- Built in async and sync environment depending on the requirements using Flask and FastAPI.
- Optimized sql queries on tables with over one million entries to run within 5 seconds.
- Improved scalability and reliability by refactoring core components and legacy code.
- Automated deployment workflows using GitHub Actions and Heroku/AWS pipelines.
- Participated in code reviews and implemented best practices for maintainable backend systems.

Apr 2025 – present  
10 months

### Nalyze, Intern

Nantes, France

- Developed a Python web app to fetch and integrate GitHub data, reducing data retrieval from 30–60 minutes to a few minutes.

June 2022 – Aug 2022  
3 months

## Education

### MS Keio University, Computer Engineering

Yokohama, JP

Master of Science in Engineering

Sept 2022 – Sept 2024

- Double degree at Keio University
- Master thesis on a taxi carpooling system designed to reduce the number of vehicles in cities. Successfully demonstrated a 30% reduction in vehicle usage through the implementation of my proposed method.

### MS École Centrale Méditerranée, Engineering

Marseille, France

Engineering Diploma (Master equivalent)

Sept 2020 – Sept 2024

- Activities and societies: GInfo (IT club), MDV (Sailing club)
- General engineering & management with specialization in computer sciences.
- Chosen curriculum: MIE (Devweb, Database), C++ object oriented programming, Front-end web development, AI and Games.

## Skills

---

**Languages:** Python, Go, PHP, JS/TS

**ML Frameworks:** Flask, Symfony, React

**Infrastructure:** Docker, AWS, Terraform, GitHub Actions

**Spoken Languages:** English (TOEIC 970), Japanese (JLPT N3), French (Natif)

**Soft Skills:** Design and planning features, Agile workflow
